Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).
- Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Status of the Application

Acknowledgement is made of the receipt of the request for an extension of time (1 month), the Amendment and the IDS, all filed 04/22/02.

Claims 1-45, 47-67, 69-113 and 118-161 are pending. Claims 1-45, 47-67, 69-113 and 118-161 are rejected. As per applicant's request, claims 46, 68 and 114-117 have been cancelled.

Double Patenting

Claims 1-45, 47-67, 69-113 and 118-161 of this application conflict with claims 1-183 of Application No. 09/685,577. 37 CFR 1.78(b) provides that when two or more applications filed by the same applicant contain conflicting claims, elimination of such claims from all but one application may be required in the absence of good and sufficient reason for their retention during pendency in more than one application. Applicant is required to either cancel the conflicting claims from all but one application or maintain a clear line of demarcation between the applications. See MPEP § 822.

The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

Art Unit: 1615

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

Claims 1-45, 47-67, 69-113 and 118-161 are provisionally rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 1-183 of co-pending Application No. 09/685,577.

Although the conflicting claims are not identical, they are not patentably distinct from each other because the same subject matter has been claimed.

This is a provisional obviousness-type double patenting rejection because the conflicting claims have not in fact been patented.

The instant claims (1-45, 47-67, 69-113 and 118-161) are drawn to a structured composition comprising at least one dyestuff, at least one continuous liquid fatty phase wherein the fatty phase is structured with at least one structuring polymer and comprises a polymeric skeleton comprising at least one non-pendant hetero atom and at least one fatty chain, wherein the fatty chain comprises at least one hetero atom and said structured composition is in the form of a wax-free solid and wherein said at least one dyestuff, said at least one continuous liquid fatty phase and said at least one structuring polymer form a physiologically acceptable medium. Claims 1-183 of co-pending Application No. 09/685,577 are drawn to a similar invention.

Although the conflicting claims are not identical, they are not patentably distinct from each other because the only distinction observed between the instant claims and

co-pending application (09/685,577) is that the instant claims are directed to a structured composition comprising a non-pendant hetero atom, whereas co-pending application (09/685,577) comprises a hetero atom.

The instant claims 1-45, 47-67, 69-113 and 118-161 are generic in relation to the species of the 09/685,577 co-pending application. Furthermore, the instantly claimed species embraced in the 09/685,577 application are embodied in the generic instant claims of the 09/618,066 application. The instant invention is broader in scope than the said co-pending application because the instant invention is generic, whereas specific species are mentioned in co-pending 09/685,577, making the claims narrower in scope. The species of the 09/685,577 application renders the generic 09/618,066 application unpatentable.
